

PRESS RELEASE

ASLAN PHARMACEUTICALS APPOINTS STEPHEN DOYLE AS HEAD OF CHINA

Singapore, 18 January, 2018 – ASLAN Pharmaceuticals (ASLAN, 6497.TT), a clinical-stage biopharmaceutical company targeting cancers that are both highly prevalent in Asia and orphan indications in the United States and Europe, today announced the appointment of Stephen Doyle as Head of China. Mr Doyle will assume the role in February 2018 and will be based at ASLAN’s offices in Shanghai.

Mr Doyle joins ASLAN’s senior management team from Boehringer Ingelheim, where he was most recently Vice President and Head of Speciality Care for China. At Boehringer Ingelheim, he led the marketing and sales for oncology, biosimilars and rare diseases in China, launching Giotrif® for non-small cell lung cancer and securing the approval for Ofev® for idiopathic pulmonary fibrosis. In his new role, Mr Doyle will oversee ASLAN’s operations and pipeline development in China.

Dr Carl Firth, Chief Executive Officer, ASLAN Pharmaceuticals, said, *“We are delighted to have Stephen join our team and helm ASLAN’s operations in China. Our recent acquisition of full global rights to develop and commercialize our lead asset, varlitinib, along with the accelerated development timeline in China that we recently announced, strengthens China’s position as an important potential market for ASLAN. Stephen’s expertise in building commercial capability and launching innovative oncology drugs will help us to execute our development plans and, if approved, launch varlitinib in the China market.”*

Prior to Boehringer Ingelheim, Mr Doyle worked for Sanofi in China, where he led the Oncology, Haematology and Transplantation business unit, and in Singapore, where he was the Regional Commercial Director for Oncology. With broad experience in Asia, including eight years working in China, and global medical and marketing roles in Europe, Mr Doyle has served across multiple functions including sales, medical, marketing, commercial and scientific communications during his two decades in the pharmaceutical industry.
